

Wallmount Remote Controls

CL-WBT-101

CL-WBT-102

CL-WBT-103

PRODUCT FEATURES

- This is a ClickOn remote control in a wall switch format
- Compatible to all ClickOn receiving devices (e.g. Dimmers, power switches, gate receivers and remote commander)
- Available in one, two and three button models.
- Each button represents one channel of the Wall-mount Remote Control.
- Each button can be programmed into a different receiving device.
- Ideal for multi-way switching applications when used in conjunction with a ClickOn Light Dimmer
- Extend the control of any ClickOn receiving devices to any part of the house without any wiring
- Code hopping
- Battery operated (battery included)
- Low battery indication
- On/Off and dimming control of ClickOn Light Dimmers.
- Easy operation: Press and release button to switch light on or off. Press and hold button to dim light.
- Frequency: 433.92Mhz
- Range: 15 to 30m

TYPICAL APPLICATIONS

- Implementation of multi-way switching when used with a ClickOn Light Dimmer or Power Switch.
- Add a Wall-mount Remote Control at any location to extend control of a dimmer or power switch.
- Panic button in conjunction with a ClickOn Gate receiver connected to an existing alarm panel.
- Gate Automation. Install a Wall-mount Remote Control inside the house to let visitors in through the main gate.
